

Abduco by Mario Tarasini - Video - DOWNLOAD

Abduco is an incredible penetration effect, where a lighter goes through the middle of a card.

Effect:

The spectator selects a card from the deck. You put the card on top of deck and push a lighter right through it. A few moments later the hole magically disappears and the card can be handed out for examination.

You will learn how to make an incredible gimmick - a new flap system! No latex needed!

Did we mention that this gimmick works with any card back design?
