

## Five to Five by Alejandro Horcajo - Video - DOWNLOAD

**Five to Five** is a version of the classic Banknote Paper effect. An effect that has passed from generation to generation and this time we have created a more organic version. In this case we transform a package of chewing gum 5 into 5 notes of five euros or five dollars.

We have not only tried to create an organic version and different from what is already on sale. We have also tried to make the effect visually very shocking and almost without hand movements.

It's fast. Visual, and easily reset.
