

## **Kit Kers by Alejandro Horcajo - Video - DOWNLOAD**

**Kit Kers** is a transformation of chocolatines. Where you can get very surprising visual effects.

It can be used both in public and on social media.

Giving to choose a chokolatin among many to a spectator.

The prediction is opened and turns out to be a different chocolate to the one chosen by the viewer. But with a magical pass the chokolatina becomes the one that the spectator chose. An effect you can always wear on it.

We teach you how to make it. And how they handle it.

A chokolatina that will open your creative mind to create many effects with it.

It is not a Kit Kat product, nor is it a product of snickers, it is a product of magic.
