The next level is here! An automatic visual card change like nothing you have seen before.

We have all seen a card visually change color. There have been hundreds of variations based on a few basic and familiar methods, until today!

You can now do a visual color change with a coin on top of the card the entire time, and yes it is the same coin on top of the card before and after this insanely visual change.

This is next level, automatic visual magic like nothing you have seen before.
