

Thought Master by Patrick G. Redford - Video - DOWNLOAD

Thought Master allows you to take any deck of cards and stack into any your memorized order by performing one powerful mind reading effect. Handlings include impromptu methods that may involve anywhere from one person all the way up to ten participants. We also include both memorized stack handlings and methods that require no memory or stack work!

These later handlings will not allow you to secretly stack the deck but you'll still be able to perform this killer mind reading effect with any deck of cards.
