

## 4xpoker by Jan Zita - Video - DOWNLOAD

The spectator freely chooses a playing card and hides it in his pocket. The magician then deals four piles of four cards. Meanwhile, as the magician tries to read the spectator's thoughts and reveal his chosen card, the spectator chooses one of four piles. At the end of the trick, the magician reveals the value of the spectator card, which together with the selected pile forms a great poker hand.

This trick is almost self working and it can be performed with any deck of cards without any special props.
