

Brain Scan by Russ Wagg - Mixed Media - DOWNLOAD

BrainScan is the new "must have" addition to your smartphone. Your spectators will believe that your "new amazing app" can actually read their minds. Within 5 minutes of downloading **BrainScan** you will be able to use it. Beginner to Master Magician, it's easy and amazing.

How it works:

A spectator chooses a card. You start the **BrainScan** app. Our talking avatar and magical assistant "Samantha" begins talking to the spectator, informing them that she will perform the scan. A highly visual 8 second scan is done and Samantha reappears to make a few comments and reveal the card. You have full choice of what Samantha says. If it's an adult environment and you would like her to say something spicy, you can do that. If your spectator is a child, Samantha can be very nice and complimentary. Your audience will be in stitches with some of the things that Samantha says.

BrainScan can be used to read up to 3 minds all at once, with 3 different card selections!

BrainScan can also be used for Celebrity Name Reveals and it works great with Appearing Business Cards.

We can't emphasize enough, how easy it is to use **BrainScan**. And here's the nice part, it's instantly repeatable with no setup. The possibilities with **BrainScan** are endless. **BrainScan** can be used with any smartphone or tablet and it's a perfect trick to use for your Zoom shows
