

The Z. System by Molim El Barch - Video - DOWNLOAD

Imagine being able to mindread or predict literally ANYTHING!

You spectator thinks of a name, you reveal that you have written down that name before he told you!

He thinks of a famous person, in an instant you reveal a picture of that person on your phone!

He thinks of any place in the world, you reveal either a picture of that place on your phone, or a map, highlighting that area.

The possibilities are truly limitless with this idea!

And you can twist everything around and make your spectator become the mind reader as well!

Open a picture on your phone, of literally ANYTHING, ask your spectator what he believes is to be seen on that picture and let him be truly mind boggled after you show him, that he was completely right with his idea of what is to be seen on the picture!

Let somebody think of any time of the day, only to immediately reveal a picture of a beautiful pocket watch that stopped at that exact time your spectator has thought of!

Many say, that this effect alone is worth the price of the system.

At no point do you have to force anything in any of your performances! Whether your audiences are thinking of a famous person, a place on this earth, a name, a picture, a painting or a time the pocket watch of your grandfather has stopped, it is always a completely free choice of your spectators!
