

Algoritma by Asmadi - Video - DOWNLOAD

This is a simple effect that uses only one envelope and one prediction but will amaze your spectators. Whatever pattern is chosen by the spectator will match the pattern in the prediction. At the end of the prediction everything can be checked by the spectator.

This effect works well and accurately because it has a programmed smart system called **ALGORITMA**. You can do it anywhere, whether it's real or virtual. When you do this, the people around you will shout this is crazy!

The Gimmick is very easy to create because it includes an instructional video that can be learned in 11 minutes and a pattern in PDF format.

So don't miss this opportunity and buy today!

Note:

- Only one envelope and prediction
- Predictions can be signed by spectators
- Spectators are free to make choices
- Predictions can be checked at the end of the show
- No flap, no change, no duplicate, no magnets, no switch
- 100% accurate
