

Homing Moneyland by Marcos Cruz - Video - DOWNLOAD

The "Homing Card" created by Francis Carlyle and popularized by Fred Kaps, is perhaps one of the most popular magic routines among magicians.

What if you could incorporate it into your magic shows? Marcos Cruz presents his version **HOMING MONEYLAND!** With \$20 bill that is transformed in front of the eyes in money from the famous board game Monopoly, visual, fantastic and fun.

A routine full of participation in which the public, from their site and without contact, will shout and laugh seeing the magician in distress.

Forget about complicated handling and dedicate yourself to enjoy and excite your audience with this fun routine.

Ideas:

You can use the set of tickets to teach math, explaining the rule of addition and subtraction or in an adult show talk about economics.

"It is an excellent version, very clean and you have given a total twist to this method."

- **Quique Marduk**

"I have seen different versions, but with money and a monopoly and you killed me with the appearance of a game board."

- **Wild Magician**
