

Hizli GeCiS By Sihirbaz Ali Riza - Video - DOWNLOAD

An amazing visual restoration unlike anything you have seen before!

You clearly tear the pull tab off of the soda can and drop the tab into an empty clear glass bottle. Even though the cap is on top of the clear bottle you slowly see the metal pull tab come to life! It floats up inside of the bottle and then instantly vanishes, reappearing visually back on top of the soda can. It is really attached and you can show the glass bottle completely empty! Easy to perform and master!

Download it today!
