

Hole through Hole by Mario Tarasini - Video - DOWNLOAD

The spectator chooses one card. (No force).

The magician shows two cards with a hole and places a spectator card between them.

Press your finger and the card from the middle moves through the next card and falls down.

And this is just the beginning!

The magician re-inserts the spectator card between two cards with holes. The card visually disappears and teleports back to the deck of cards!

This is a very clever card routine that you will definitely enjoy showing!

Don't hesitate and buy!

Additional supplies may need to be purchased in order to perform this effect.
