

Coin Trip by Alex Soza - Video - DOWNLOAD

In this download you will learn to perform three very visual coin magic effects.

Metal transposition: This routine is very visual, 2 silver coins and a cobra coin will match in this magical piece and you will be delighted with how easy it is to perform.

Bump trip: A copper and a silver coin placed on the table, choose one of the two and cover it. The coin that will be left out just by swiping your hand will change with the previously chosen coin. The method is very simple and curious and has more applications than just a color change.

3Across: Three coins in the hand, when closing the fist each coin will travel one by one very magically to the other hand.

100% sleight of hand explained explicitly.
