Deception by Ilya Melyukhin - Video - DOWNLOAD

A deck of cards fades away until only the selected card remains.

A new gimmick inspired by Paul Harris's original vanishing deck illusion.

- Super visual! Easy to use as well as to create!
- The gimmick will allow you to vanish the entire deck of cards except for the one that the viewer chose at the beginning of the effect.
- Also with gimmick, you can make half of the deck disappear and leave only those suits or the specific cards you need!
- You can also do a full deck transposition with a full deck of cards in one hand and a single playing card in your other.

Welcome to the DECEPTION
