

Person of Interest by Boyet Vargas - eBook - DOWNLOAD

Person of Interest is an upgrade to the original effect "Mental Assassin". This is a pocket mentalism effect that fits inside your wallet that can be performed anytime, anywhere. The Participant thinks of a word and a person associated with the chosen word and the Mentalist is able to identify both every time.

- No truth teller/liar plot
- No Force. Different word every time
- Can be done via video call

The method used in this effect is based on one of my newly developed principle for identifying chosen words or objects without the obvious interrogation.

"Clever - I like how you are taking the basic binary principle, but doing it in a way where its revealing additional layers of information in an innocent way. It reminds me a lot of Paul Carnazzo's style effects, if you are familiar with his work. Very cool and I like that its just one card in your wallet."

- David Jonathan
