

The Vault - Dutch Kiss by Danny Urbanus - Video - DOWNLOAD

Dutch kiss is Danny's rendition of Wayne Houchin's French Kiss.

When Danny first encountered French Kiss, he instantly loved the effect and started performing it everywhere he went. Which made him think if it would be possible to perform the effect with just one card. After countless hours of experimentation, Danny finally cracked the code, and eventually the effect evolved so far that it can be performed without playing cards. Danny's version is mainly performed with just one index card, which is perfect since it fits into your wallet and is an easy part of your EDC.

Only one card
Intimate in performance
Easy to make gimmick
Great to interact with people
Perform it straight out of your wallet
Perfect for your EDC
