The magician shows a card, a glass, and a coin that appeared out of nowhere.

The magician shows that there are no secret cuts in the middle of the card, and to further enhance the effect, he puts a sticker in the middle of the card.

The magician folds the card and places a coin in it and the coin falls straight through the card into the glass.

This is a very theatrical and visual gimmick for your social media.

You can make a gimmick in a few minutes.
