

## Next Load by David Alvarez video DOWNLOAD

**Next Load** is a set of five inspiring close-up magic routines.

You will definitely love some of what you can find here no matter if you are a pro or just a beginner!

A look at the routines:

1. AD Aces: Works perfect as an opener! Show four Jokers and have them change to Aces. No gimmick!
2. Lucid Vanishing: This looks great! Basically take your favorite coin or borrow one from your audience and now show your power to vanish it in a very lucid way inside your fist. They definitely won't believe it!
3. Simple Transposition: The time has come for four cards of the same value and one freely chosen by your audience to be teleported in space-time, the funny thing is that it will not only happen once but twice in front of everyone's noses!
4. Displaced by fire: Is there something more visual than fire? Nothing is! Make an impression on your spectators' minds with this heartwarming routine where you transform a smiley face drawn on a sheet of paper and placed on top of a chosen card into a smiley face sticker completely adhered to the card; all this between the flames. Now you have a magnificent gift to deliver!
5. Traversed: Make the matter melt to the point of being able to pass through it when you take a ring from a soda can and a rubber band and in the blink of an eye they are already inside each other. Fully examinable upon completion of his act!

Activate **Next Load** and impress with your close-up magic!

- Visual magic
- Easy to perform
- Practical
- Very fun
