

Ambiguity by Mohamed Ibrahim - Video - DOWNLOAD

Experience the power of influence. **Ambiguity** is a powerful tool that will live in your pocket!

Four cards of different shapes/symbols/playing cards/figures are shown to the participant as well as an envelope with a prediction inside. The prediction is placed on the table (no switching).

You ask your spectator to choose one of the four cards, and your prediction will always match the selection.

Optional effect:

Four cards are chosen from a deck of cards
Then you have them eliminated. Two cards, then to down to one.
Your prediction always matches their choice.

I will also teach two different killer effects with DFB app by Craig Squires and Nick Einhorn. (You must purchase DFB separately)

- Powerful with very little setup
- Works as EDC mentalism effect
- Can fit in your pocket, your wallet
- Suitable for close-up and stage
- Can be performed with DFB app
- No switches
- No sleights
- No gimmicks
- Everything is EXAMINABLE
- Completely impromptu

And the best part:

The method is only limited by your imagination, you can create different types of choices based on the same method.

What you get:

- Video explanation

- PDF
- Private Facebook group
- Special website to create yours

NOTE: The method works well with languages which contains English alphabets like (Spanish, French, Italian ... etc)

It could be a bit difficult with languages like (Russian, Bulgarian ... etc)
