

Lighter Than Air by Salvador Molano - Video - DOWNLOAD

Take off your shoes and levitate in your socks!

Whenever you want to take off your shoes, you stay in socks, show your feet with socks on from all angles, there is nothing to see.

Tell a spectator to extend their arms and with their hands out in front of them they grab the yours. In a few seconds you begin to levitate, once in the air, slowly descend and show your feet underneath and all around showing that there is nothing under your feet. You can spin in the air!
