Alternate presentations for the invisible deck!

Even though, the invisible deck is a great trick, I have rarely seen a demonstration that differs from the original "take an invisible deck and turn over the card". Yes, this performance works, but... well, there can be so much more. Because this trick has become public domain in kids toy magic sets, we must find new and fooling ways to present this.

I decided to dig deeper and see what else interesting things can be done with this deck, and decided to create this guide to the Invisible Deck!

- Over 300 options for demonstrations and upgrades to the Invisible Deck
- More than 40 video sources
- More than 110 books and magazines.

Here you can find the title, book, short description, page or timecode to find the option you like.

All options are divided into chapters, for easier navigation.

This is the first part of the INVISIBLE DECK project and the book will be constantly UPDATED!
