NINJA STACK by Matthew Wright (- Video) - DOWNLOAD

The **Ninja Stack** is a great way to introduce yourself to memorized deck work.

memorized decks are one of the most powerful and deceptive tools in magic with thousands of incredible routines published and readily available to magicians. Miracles can be performed whether you are a magician, mentalist, gambler or trickster there are many hidden untouched gems just waiting to be discovered. The problem is memorized decks can be tough to learn and can take months and years to perfect.

The **Ninja Stack** takes a fresh approach to teaching stack work and is a great introduction to anyone unfamiliar with memorized decks. The teaching is fun and interactive and will allow you to get to grips with the stack and start understanding how to use it within the first few hours. Learn with deck in hand as you watch the tutorial expertly taught and shot by Matthew Wright.

This is a deceptive and random looking mnemonic cyclical stack which means it is one of the easiest to remember but the way it is put together makes it even easier, giving you the ability to recall not only the order of each and every card but also their numeric position in the deck.

In the 1hr 45 min download you will learn not only the order of the stack but also incredible effects such as weighing the cards, dead cutting to any named card and an incredibly clean ACAAN. A little brain power is needed at first to understand the deck and its workings but the pain is taken out of the process with a fun and interactive teaching style. Once you have the stack locked in its very easy to remember and recall and will stay with you forever. The ACAAN takes a little extra maths but nothing too exhausting.

Ninja Stack is a great way to learn your first memorized deck and will probably be the only one you will ever need.
