

RCARN: Random Card At Random Number (APP) - DOWNLOAD

For years I've been hunting an ACAAN for real workers. An ACAAN that is instantly repeatable, ridiculously easy and 100% hands-off! Oh, and the best bit: a choice that could not feel more free.

Here's the deal: you let the spectator freely play around with a website/app that allows them to generate random cards and random numbers, totally separate from one another. They can change their mind as much as they want. It could not feel more random.

After one final decision to change either the card or number, they end up on a seemingly random pairing; one that they wouldn't have thought of on their own!

Then comes the impossible. They deal through a REAL pack of playing cards that has been on the table the entire time and find THEIR card at THEIR number!

To recap: they change their mind as much as they want. They stop on a random pairing. They deal the cards themselves. You never even touch the deck. It works every single time. It resets instantly. It ends clean. You can use multiple cards and numbers AT ONCE! You can use ANY order of cards!

Come on now. That's just silly.

If you're looking for a bulletproof ACAAN so easy you can perform it in your sleep, might I introduce... **Random Card at Random Number.**
