

This Is Not A Game By Simon - eBook - DOWNLOAD

"I used one routine at dinner. People talked about it the entire night."

- Leonard Davis

When Coincidence Feels Like Destiny

Have you ever been in a moment where everything just... aligned? A phrase said at the right time. A subtle look. A random choice that somehow changed everything. If so, you already know: what we call "luck" is rarely accidental.

A true mentalist doesn't manipulate cards - he manipulates perception. He doesn't show tricks - he reveals what was meant to be.

Crafted in silence, built for impact - this manual holds the unseen mechanics of connection. It decides how moments of casual interaction can be turned into unforgettable experiences in conversations, dates, or spontaneous encounters.

Picture yourself at a bar, surrounded by strangers. Within minutes, you're revealing someone's best friend's name... guessing their exact dinner order... or asking a spectator to multiply random digits on their phone's calculator - they might laugh at the meaningless result. Until you say: "Call it." And when they do... your phone starts ringing.

No stage. No spotlight. Just presence. Precision. Power.

And when they ask: *"Wait... how did you do that?"* You smile and say: **This was never just a game.**

What You're Really Learning Here

Forget expensive props and stage theatrics. This is mentalism stripped to its essence: Real choices, real reactions, real moments.

You'll discover techniques that feel unscripted - and hit with undeniable clarity.

Moments disguised as jokes. As intuition. As accidents. You'll learn exclusive methods that look casual... but hit with surgical precision.

Routines Like:

- **The Invisible Book Test** - You hold an imaginary book and mime flipping through its pages. The spectator chooses a page and thinks of a word. You name it - with 100% accuracy.
- **My Best Friend** - Reveal the name of someone's closest friend - even if you've just met. A simple, elegant, and deeply powerful routine that feels personal and unforgettable.
- **The Game Never Started** - In a game where people write a random word and stick it to your forehead, you reveal it with precision. The twist? You remove the paper... and show that the word was never written - and the pen? Doesn't even exist.
- **Cognitive Cap** - Straight from my book 7 Mysteries, you reveal under which of seven bottle caps a spectator hid an object - all while your back was turned. No magnets. No electronics. Just pure psychological precision.
- **Mirror Order** - Know what people will order even before they make their choice. Guess their favorite desserts and more - in this routine of predictions and revelations, anything is possible.
- **The Suitor** - She multiplies random digits on her phone - laughing at the meaningless result, You tell her to call it. She hesitates... then dials. Your phone rings. A random number born from chaos... or something written in fate?
- **My Favorite** - By simply looking into their eyes and applying a subtle touch to their hand, you reveal their favorite playing card - a direct and impossibly clean method to uncover any thought-of card.

These aren't routines built for magicians or mentalists - they're made for real people, in real situations. Perfect for moments that happen naturally: at dinner, over drinks, during unexpected conversations. But if your stage is larger - these pieces scale beautifully. What feels intimate up close... becomes powerful when amplified.

Why Most Methods Fail

Most mentalists are told they need gimmicks, setups, or scripts. But none of that survives at a dinner table.

When you're with real people - in real conversations - you need tools that feel

effortless, natural... and unforgettable.

That's what this book delivers.

And if you're still unsure...

"I don't have much experience with mentalism." No problem. The methods here are designed to be simple, powerful, and immediately usable - even for beginners.

"But I'm already a professional." Perfect. You'll find structures and subtleties that will elevate everything you already do.

"Do I need special gear?" Absolutely not. Just billets, a pen, a deck of cards, your phone - or nothing at all.

- Create unforgettable moments anywhere, anytime
- Build a reputation as someone who sees beyond the obvious
- Connect deeply - and leave people speechless
