**MAMMOTHS** used to be means immense in size or power - and **Mammoth Tear** delivers exactly that and more.

This is a two-step center tear where you have the 'option' to cleanly show both the front and back of the folded paper - with absolutely nothing suspicious to see. It's bold, deceptive, and incredibly fair.

### Not ready to peek right away?

No problem. **Mammoth Tear** features a clever design that lets you steal the center with ease. It also allows you to open it with a single hand, the right side up, always - giving you complete control over the timing.

The ability to access someone's secret information without tipping them off is a mentalist's dream. Doing it this cleanly and this fairly, right under their noses, feels like a superpower - and with **Mammoth Tear**, that power is now in your hands.
