NOT.ESP by Jake Keane - DOWNLOAD

Deceptive. Deadly. Direct.

This is **NOT.ESP,** your new favorite everyday mind-melter.

A hand-drawn prediction system masquerading as a harmless notes app.

Designed to mimic real telepathic predictions, **NOT.ESP** lets you perform impossibly deceptive drawing duplications. Instantly, on the fly, and in full view of your spectators.

Where **NOT.ESP** accelerates into a league of its own compared to other Drawing Dupe Apps is that neither you or your audience ever say the word or drawing out loud.

 This is how clean it is... you draw something and "mentally transmit" that image to your participant's mind... they then draw it, in their notes app. Hands off, they turn your phone over and their images are a perfect match.

Due to the devious method, you can choose how you want to perform this. Either you draw your image first, as a prediction. Or they can draw an image and psychic transmit it to you to draw.

The crazy part is, they don't even need to draw it on their phone. They could literally just draw it in the air using nothing but their finger.

Hands down, **NOT.ESP** is Jake Keane's (one of the worlds' leading underground mystery artists) everyday, go-to mentalism opener.

It's fast. Fooling. Freakishly flexible. In the right hands, it could create cults.

This is NOT.ESP

Not a trick. Not a gimmick.

A drawing duplication system disguised as an everyday app.

Oh... one more thing.

With every purchase of **NOT.ESP** you will also receive a brand new, unreleased app completely for free; **NOT.ESP+.**

NOT.ESP+ takes the incredibly strong foundations from the already powerful entry level **NOT.ESP** app and superchargers to make it more powerful than we can literally comprehend right now.

Now you can predict and reveal ANYTHING. Seemingly using ANY app in your phone.

Some have even said **NOT.ESP+** is strong enough to be a stand-alone $100 release - and honestly, we agree! We tried to talk Jake into it, but as a "man of the people," he insisted on including it as a free bonus app- his way of giving back to the community that supported him from the start.

So, grab **NOT.ESP+** before he finally comes to his senses and changes his mind!

FAQ's

- Works on iOS & Android.
- Works in any language.
- Once installed, it needs no network connection.
- Very, very easy to do.
