*"A truly shocking reveal with incredible potential."*
 **- Colin McLeod**

*"Modern. Visual. Effortless. Exactly what I've been looking for."*
**- David Penn**

**Classic Redefined. Magic Digitized.**

**Svengallery** is a bold reimagining of the classic Svengali deck - built for the digital age.

The spectator selects an image - even the latest one from their phone - and in an instant, it visually appears in your gallery. Then, in a flash, every photo becomes that same image. Clean. Direct. Impossible. And just as quickly, your gallery resets... ready to go again.

**But Svengallery isn't just a trick.**

It's a powerful utility system for modern performers.
