COMPATIBLE WITH ATC: This product also works with the ATC (Appmazing Thumb Controller) - a next-generation Bluetooth device cleverly hidden inside a thumb tip that allows you to secretly control the application at a distance.

We present the true Swiss Army knife of mentalism: a multifunctional tool designed to elevate your routines, create brand-new effects, and perform miracles that were impossible until now. Infinity was awarded at the National Congress of Almussafes 2022, recognizing its innovation and impact in the world of magic.

Appmazing's **Infinity** is an app that looks like a regular calculator, but in reality, it is a complete mentalism arsenal. Unlike any other gimmicked calculator on the market, Infinity allows you to perform a wide variety of impossible effects - always ready in your pocket. Infinity has been designed with 4 powerful working modes:

- **Force Mode** - Instantly force preset or improvised numbers.
- **Mind Reading Mode** - Reveal freely thought-of numbers with no forces or peeks.
- **Timer Mode** - Predict the exact duration of any event.
- **Cards Mode** - Perform stacked deck miracles without memorizing the order.

When paired with the ATC, you can use all four modes remotely, sending or receiving information without ever approaching the phone.
