

Hypermnnesia by Féodor (APP) - DOWNLOAD

More than just a trick - a hyper-realistic memory demonstration that leaves no doubt. A true reputation maker.

Many people remember a time when they could dial twenty phone numbers from memory. Today, most people know only two to five.

With **Hypermnnesia**, you show that you can recall not only all your contacts' phone numbers, but also all the related details: addresses, door codes, emails, birthdays...

Imagine the moment when a spectator randomly selects one of your contacts from among hundreds... and you're instantly able to recall their phone number, their email... Then another one, this time including their birthday... and another... and another...

You end the demonstration on a high note: the spectator names three digits and types them into your phone's search bar. After a brief moment, you announce all the contacts whose numbers contain that sequence.

A clever, organic, zero-prep effect - and a powerful enhancer for all your other memory-based routines.

Enter the mind of a real mnemonist!

No crib, no hesitation, no internet connection, no smartwatch, no sleight of hand. Just a simple, credible, organic, and lightning-fast memory demonstration that will convince any audience.

Intuitive

Download the app and start showcasing your abilities.

Undetectable

Even if a friend carefully checks your contact list.

Offline-ready

No internet connection required - always ready to go.

Multi-phase structure

Several phases that build upon each other and escalate in impact.

Customizable

Use the built-in contact list or import your own.

Multi-language support

The app is available in French, English, Spanish, Portuguese, German, Dutch, Danish, Chinese and Korean.

What the pros say

Trusted by magicians and mentalists around the globe.

"Hypermnesia is brilliant!!! Super excited to explore it further and share my findings with the community!"

- **Michael Murray** - Magician / Mentalist

"A genius app that gives your audience the most convincing illusion that you can memorize everything - like Rain Man."

- **Christian Grace** - Magician

"We highly recommend Hypermnesia to all magicians. It's easy to use and delivers a stunning, uncompromising memory demonstration."

- **The French Twins** - Magicians

"If you could REALLY memorize your entire contacts list then it wouldn't look any better than this. It's genius. Highest recommendation!"

- **Mark Elsdon (from The Fig)** - Magician

"Hypermnesia will turn you into Rain Man! Well designed app, with lots of possibilities."

- **Max Major** - Mentalist / Hypnotist

"I love it! And if you've got a premise you're excited about, Hypermnesia is a well-made tool that's worth the..."

- **Andy the Jerx** - Magician

Every number has a story... and now you know them all.

FAQ - Hypermnnesia

1. What is Hypermnnesia?

Hypermnnesia is a web app designed to create an ultra-convincing demonstration of memory. It allows you to simulate a prodigious memory, giving the illusion that you know by heart all the contacts in a real phone directory.

2. Is it a mobile app or a website?

It's a web app, accessible from any browser, with no download required.

3. What kind of effects can be performed with Hypermnnesia?

The main effect is an impressive memory demonstration, where you appear to know an entire phone directory. You can also perform prediction effects and coincidence routines using a forcing system. Additionally, Hypermnnesia can be used either improvised or pre-planned, in casual settings or professional performances.

4. Is it detectable by the audience?

No, Hypermnnesia is designed to be completely undetectable. Everything looks normal, and no suspicious movements give away the method.

5. Do I need an internet connection during the performance?

No, once set up, Hypermnnesia works without an internet connection.

6. Does Hypermnnesia require an assistant or a stooge?

No, everything can be done solo. There's no assistant, no peeking system, and no crib sheets.

7. Is it based on a complex memory method?

No, there's no effort required. You can start after just 5 minutes of setup, using phone numbers you already know (friends, family, your social security number, a mnemonic sequence, etc.).

8. Does it use my real contact list?

Yes, but you have control over it. While we recommend using your real contact list, you can easily remove sensitive contacts if needed.

9. Can I perform this effect on someone whose number is in my contact list?

Yes, absolutely! You can even show the spectator their own contact entry, so they can confirm to others that all the numbers are real.

10. Can I force a specific phone number for an effect?

Yes, you can pre-select specific numbers to force, making the effect even more convincing and customizable.

11. Is Hypernesia compatible with other mentalism tools?

Currently, Hypernesia doesn't directly integrate with other tools, but this may change in the future.

12. Does Hypernesia have a forcing system for other types of effects?

Yes, Hypernesia also allows for prediction and coincidence effects using a forced phone number. The spectator can even call a contact from your phone book using their own phone!

13. Is Hypernesia available in multiple languages?

Yes, the web app is available in French and English.

14. When will demonstrations and the official release take place?

Demonstrations will be available within two weeks, alongside the official release of Hypernesia.

15. What elements can be customized in Hypernesia?

Everything is fully customizable: phone numbers, contact names, notes, birthdates... You have complete freedom to adapt the effect to your presentation style.
