

The Magic Touch by Juan Pablo - Video - DOWNLOAD

THE MAGIC TOUCH is a truly innovative magic effect something you have almost certainly never seen before.

It is based on a principle that is entirely new to the world of magic. The effect involves a spectator naming a specific number of cards; with the deck face-down on the table, the magician simply touches the back of the deck with a finger or a magic wand, causing that exact number of cards to magically shoot out from the bottom of the deck and automatically flip face-up.

The secret lies in a physical principle applied to magic that makes this groundbreaking effect possible.

There is no other card trick quite like THE MAGIC TOUCH.

To the spectator, the effect is baffling, as it requires no complex handling of the deck you can perform this magical marvel simply by touching the cards with your finger!
