

## **Smiling Assassin (Bicycle Edition) by Meir Yedid - Trick**

A funny and surprising routine that makes people scream.

This wonderfully entertaining card routine always gets a great reaction. You display a deck of cards with smiling faces on its back. One of the cards is selected by a spectator and lost in the deck. A gun is aimed at the deck and the trigger is pulled. The gun is fired. The cards are then dealt face down on the table until you come to one card with a frown on its face, a hole through its head and blood splattered all over its face. The card is turned over and proves to be the selected card. Everything is examinable. Very easy to do.

Comes complete with special poker-size Smiling Back Bicycle cards, printed by the U.S. Playing Card Co., photo illustrated instructions and four different assassinated cards. Use your own gun prop.
