

## Wow Card - Eco - Standard

A spectator chooses a card from a deck of cards and signs his/her name across the face of the selected card. The card is replaced back into the deck and shuffled. Then the performer picks a card, which is revealed to be an indifferent card. He places it into a transparent plastic card holder. The spectators can see the face of the card inside the holder. As the magician makes a magical gesture, the indifferent card morphs into the signed selection. The card is removed from the holder and handed out for examination.

Real magic!
