

Transparent finger chopper

A miniature "guillotine" in clear plastic. The effect is simple but surely of high impact.

Show how the chopper perfectly cuts anything you introduce in both its holes: a small carrot or sausage will be perfect.

Now ask a spectator to introduce his forefinger. Bring the blade down quickly and of course the finger will be unharmed! It will look as if the blade has passed through the finger.

- Comes supplied in a catchy and colorful box.
- This model of the Finger Chopper has a unique locking mechanism and is **examinable**, even by magicians familiar with the normal prop.
