The GT Speedreader Standard is very EASY TO READ...yet SPECTATOR SECURE.

Very easy to read, yet not screamingly obvious when in view.

Intuitive marking system on a BICYCLE backed card.

Read it INSTANTLY, right out of the box.

The **GT Speedreader Standard** marking system is 100% UNDETECTABLE by the spectator when the deck is spread, because the marks are CONSEALED. Design best suited for right hand performers.

These marked cards are even undiscovered by people "in the know" about marked decks.

Based on concepts from Ted Lesley, *EVERY ASPECT of these cards were thoughtfully designed for working magicians AND how spectators examine cards.* Even includes a poker hand guide card as a subtle convincer to your spectators as you open a new deck -- that they are everyday cards.

In fact, your favorite magician is probably using them and you don't even know it!
