## **Flash Production Table**

THE PERFORMER PRODUCES A WORKING TABLE FROM THIN AIR! Unlike other similar tables which tend to wobble, this provides a very firm usable surface that will hold almost any magician's props you can fit on the working surface.

• The complete table is cm 86 (in. 34) high, while when closed it measures cm 30 x 5 x 12,5 (inches  $12 \times 2 \times 5$ ).

• It instantly opens and springs into a view, with metal tripod stand and a working table top with tassels.

• Produce it from behind a newspaper, bodyload, or just transform the board instantly to a complete table.

• The table comes ready for use.
