

## Multum in parvo by Bazar De Magia

The milk contained in a huge glass of milk strangely diminishes as it is poured into a smaller glass. It then diminishes once again as it is poured into an even smaller glass. But that's not all, as the milk diminishes again after having been poured into a really tiny glass. Time after time the milk seems vanish into thin air, and at the end the milk that was contained into the huge glass fits perfectly into the tiny one.

Ideal magic for both children and adults.
