

The Shiva Wallet by Anthony Miller - Trick

The Shiva Wallet is an ingeniously constructed gaffed wallet which is made to look like a standard hip pocket billfold. The closest thing it can be compared to is a Z-Fold Shogun. Nothing like it has ever been made before.

It has four separate playing card sized compartments with camouflaged patricians giving you a total of eight different positions you could place a prediction. A natural looking eight-out wallet is extremely useful and something a mentalist can't live without. But that is not all. The wallet has two additional pockets that can be used for outs and two sections you could place a post it pad with two additional outs. So if you really need it you could have 12 outs!

In addition to using it for outs the Z-Fold and Shogun features make it a switching wallet which has unlimited uses for both magic and mentalism.

Hand-made in the US, of very high quality black leather, by Tony Miller. Includes a link to basic video instructions which can be found on the web. The wallets dimensions closed are 4.25" x 3.25" x 0.5". This is a very limited edition so get one while they last.
