

Metal Blind Fold

You show an opaque metal sheet in the shape of a blindfold and put it over somebody's eyes. The spectator cannot see anything through it. You then show a black bag and put it over the spectators head. He can see only darkness through it, not even a single ray of light. You then wear the metal blindfold over your eyes and the black bag over your head. Blind folded in this way, you can drive a car, a bike or cycle through the busiest street of the town.

We supply The blindfold made of metal sheet and a black bag to use during the performance.
