

Handz Up trick - Hot Trix

Effect

So Realistic, You`ll Fool A Surgeon!

This system has been known for a while already and has been widely used for paranormal presentations or wacky offbeat acts. Unfortunately the entertainment industry was never able to produce this kind of gimmick because the technology involved in making a product of this standard was too expensive for this small a market. Hottrix changed that and once more enlisted Swiss craftsmen to make you look good. Handz-Up has veins, hand painted details and is modeled with so much care to lifelike appearance that it actually looks and feels like a real hand! If you perform the "Seance Cloth" or self levitation effects then you`ll appreciate the self-grip properties. You can easily attach Handz-Up to a book, jacket, pizza box, microphone stand or whatever else you can get your Handz-Up on! rite for many years to come. Comes complete in protective package with full color manual including 15 photos.
