

Invisible Elastic (1000 ft Spool) by Supreme Magic World - Trick

This is the strongest and the thinnest **Invisible Elastic Thread** on Earth!

The thread is wound on a spool by a custom made machine so there is no chance of the thread getting lost and tangled.

The spool contains a whopping life long supply of 1000 ft... Yes. A single strand of 1000 ft. The length of the thread is more than 2 football fields!

It has the greatest stretch-ability of all threads and is absolutely invisible in most light conditions, which makes it the most appropriate thread for making those magical invisible bands.
