Elastic Utility Thread (200 m/218 yards)

Constructing quality gimmicks demands quality tools. The Murphy's **Elastic Utility Thread** is a tough, durable, clear elastic thread that can handle almost any application. Each spool contains 656 feet (200 meters) of transparent, elastic thread. The thread has a high-tension strength, with a low-gloss finish that will keep your thread hidden when in use. No stripping required so you can start using it out of the box. **If you are repairing a card gimmick or inventing a new trick EUT is a must have for your tool box.**
