Card Fountain - With remote control

By using his manipulative skills the magician produces many cards from different places, and throws them in a hat on the table. He then makes a magical gesture towards the hat, and all the cards inside, fly out of it like a fountain of cards. • Only the mechanism that allows you to produce a fountain of cards is supplied (you can use your own cards and hat). • The fountain is remote controlled, and works with eight 1,5 Volt batteries (not supplied). It measures cm 14,2 (5,59") x 14,5 (5,7") x 9,9 (3,89").
