

## Leap by Agus Tjiu - Trick

**Leap** is a Coin-Through-Glass (or Ring-Through-Glass) effect, greatly improved in its presentation and method versus "the old days."

There have been many great methods available in different formats, such as a pedestal under a shot glass inside of a larger glass, an item resembling a coaster, to utilizing a table.

Some of those items are inconvenient to bring along and use for close-up magic or table hopping.

**Leap**, therefore, was developed for this effect - it is much easier to use, more convenient to bring along, and doesn't look suspicious.

And it utilizes something that most magicians already carry with them -- a deck of cards!

Hence, **Leap** is born.

- A signed coin visually penetrates a solid glass, landing in a shot glass inside the larger glass!
- Or, a marked finger visually penetrates a solid glass, landing in a shot glass inside the larger glass!
- Easy to do
- Looks natural -- accomplished with an innocent-looking gimmick
- No electronics -- everything is in your complete control
- Simple method -- one-hand touch

What you get:

- A shot glass
- Red Card Box
- Blue Card Box replacement
- Instructions

You will amaze your audiences with **Leap**!
