Flash Gum by João Miranda and Julio Montoro - Trick

Welcome to **Flash Gum**, a creation of João Miranda and Julio Montoro.

This is a visual trick that will leave your spectators totally speechless.

In this effect, three cards are chosen and lost in the deck.

After a magical pass, the cards vanish from the deck and travel into a pack of gum. The first card appears visually on top of the gum packet. In the second phase, the whole packet visually morphs into the other two selections.

Flash Gum looks like real magic. Best of all, the gimmicks are always ready to go at a moment's notice, taking only a few seconds to reset.

This truly looks like real magic!

Get **Flash Gum** now, and get ready to astonish your audience with a casual, yet very powerful, visual illusion.

Keep in mind:

- The gimmicks work AUTOMATICALLY
- The specially made gimmicks are ready to be performed right away (no arts and crafts needed)
- The gimmicks are very durable and are professionally made
- A pack of gum is included along with the gimmicks and instructions
- TV rights are included with the purchase
