

Occultatum by Menny Lindenfeld - Trick

This mentalism effect will knock your spectator's socks off!

*"Menny demonstrated **Occultatum** over and over again, each time discovering the coin I've supplied and hidden myself. I have no idea how he did it. MENNY BLEW MY MIND!"*

- Uri Geller

"I like Menny's attention to detail. He understands that deliberate subtleties enhance the performance, and the result is that OCCULTATUM IS BOTH PRACTICAL AND STRONG."

- Max Maven

We are super excited to bring you **Occultatum** - one of Menny Lindenfeld's most closely-guarded underground secrets in mentalism.

Occultatum ("Hidden" in Latin) has been Menny Lindenfeld's secret weapon for over a decade. It is a PSYCHOLOGICAL SYSTEM that helps you detect a hidden object.

Imagine:

A participant hides a personal object (e.g. her ring) in one of many boxes.

She has a real FREE CHOICE to hide the object in any box.

She can FREELY MIX the boxes as much as she wants.

You can be blindfolded or even OUT OF THE ROOM during this process.

And when you come back, you GENUINELY DO NOT KNOW where the object hides.

And yet, without the use of electronics or magnets, and WITHOUT ASKING THE SPECTATOR ANY QUESTIONS, you are able to guess where the object hides - using the **Occultatum** psychological system.

You can perform with any number of boxes, or without any boxes at all - by simply letting someone sign an object instead of hiding it.

You can apply the system for close-up, for stage - using large objects (e.g. a basketball) or fully impromptu - using everyday objects (e.g. disposable coffee

cups, beer caps, beer coasters, packets of sugar, and more).

You can even perform with your own business cards - which is a powerful and a memorable way to hand out your cards.

The METHOD IS BULLETPROOF and works with 100% accuracy every time.

"OCCULTATUM by Menny Lindenfeld: **EXCELLENT!**

I very rarely review magic, however this is something you've got to be made aware of - it is very special!

I have always loved the premise of the effect where the spectator hides a small object in a unknown location and you find it!

I have done the Koran effect with three coffee cups and ring for more years than I can remember! However OCCULTATUM takes this to a whole new level.

I would imagine that a lot (most) magicians that purchase this effect will probably only watch the first 20 minutes of the excellent tutorial and by then will have learnt the method, however this is only 10% of the real secret!

I really urge you to watch and digest the remaining one hour 40 minutes where Menny goes into great detail of his superb presentation skills, his essential body language and the psychology behind this piece of what the spectators will perceive as being you to be something out of the ordinary. Otherwise all you will have is a good magic trick rather than a reputation making piece of pure beauty!"
