

The Third Hand - Small

The magician enters the stage and opens a sheet in front of him. The audience can see both the artist's hands resting on the sheet, but will remain speechless when they see objects starting to fly, and others to appear and others changing colour.

It's amazing!

- The package contains instructions and a hand with some good ideas of presentation.
- Available in two sizes. Choose the big one if you do not have a small hand (children, women, etc).

NOTE: The hand can be slipped on over your fingers and is made from rubber-like material (not rigid plastic).
