

Sticky Dots 3D (125 dots 1/2" diameter) Bag of Singles

Zots are quickly making their way into the magic community, not only as an alternative to magicians wax and other sticky substances, but also for new uses only now possible. Zots are clear, non-toxic, and will not leave a residue.

Zots contain an advanced clear adhesive which is extremely strong and makes them perfectly suited for applications such as IT anchors (stealthy and will not pull out of IT), card work, attaching items to clothing (ie, concealed magnets for stealing and ditching - larger Zots are best), gaffing out items, and hundreds, and hundreds of other uses.
