

HOLE 2.0 (BLUE) by Mickael Chatelain - Trick

Spectators are more and more skeptical these days; they need to see in order to believe! With HOLE 2.0, your spectators will still not believe what they have just seen!

Take out your deck and spread the cards between your hands. Right in the middle of the deck you discover two cards that are a bit different. First, their backs are of a different color than the rest of the deck and they also have a quarter-sized hole in the middle.

Take out the two cards and allow them to be thoroughly examined. Your spectators will see that, apart from the holes, the cards are absolutely ordinary.

Next, take the top card of the deck and spread out the two examined cards.

With no false moves or manipulation, the card (the six of clubs) is slid between the two cards with holes. Everything happens under the nose of the spectators, inches away. Everything is clean, nothing suspicious to ruin the illusion.

Show that the six of clubs remains mostly visible from front and back. Tell you spectators not to blink and to concentrate on the six of clubs.

Hold the three cards firmly between the thumb and forefinger of each hand. Concentrate!

Although absolutely impossible, the six of clubs passes through the lower card and lands on the table. Matter through matter in full view and under the very eyes of your spectators!

Immediately hand out all three cards to be examined at the leisure of your spectators.

Nothing, absolutely nothing, can be found. The three cards are perfectly normal! How is this possible?

This description is 100% faithful to each step of the trick.

Please note the following important points:

- The gimmick, and a gimmick there is, is truly diabolical!
- The cards are examined before and after the trick. Believe me, no one will find the method used.
- Easy to do, the "secret" takes care of everything!
- The card is genuinely sandwiched - no optical illusion, however it escapes as if by magic!
- DVD and gimmick included.
