

Magnetic ring - Gold - Large (22 mm)

EFFECT 1: The magician shows a coin of 5 Euro cents in one hand and an empty bottle of glass closed. In an instant, simply by hitting the glass with the coin, this will end inside the bottle.

EFFECT 2: The magician opens a classic box of matches and from the drawer he takes 1 Euro coin. It closes the box and places the coin on top. In a moment the coin will pierce the cover finishing inside the box.

These are some of the possible effects with this tool. You'll find them both explained in the instructions with a third one.

- You can choose the ring in SILVER or GOLD colour and in sizes small (18 mm in diameter) or medium (20 mm in diameter) or large (22 mm in diameter).
