A spectator's signed card appears inside a brand-new, sealed deck of cards. Not only is it in the deck, it is also in the correct position.

Mark has been performing different versions of **Fully Loaded** since 1995. After reading a small manuscript by George Schindler, he was addicted to this effect.

Mark has tweaked, re-tweaked and tweaked different methods for the Signed Card to Sealed Deck. What you have here is the method and the gaffs he has been using for the last three years.

Over the last 17 years or so, Mark has been asked literally thousands of times if he will ever release his handling to the magic community.

This one single item has gotten Mark more bookings for both magicians and laymen than any other piece of magic he has EVER performed.

**Fully Loaded** can be incorporated into ANY card routine. The incredible thing is, it's really not difficult to do and is well within the means of the average card guy.

What's inside?

Three HANDCRAFTED locking/unlocking card gimmicks (these help to load the card smoother than silk every time). Then they unlock to become a part of the spread deck.

One overlap gimmick.

A deck holder.

A step-by-step DVD covering everything you need to know about this incredible effect.
